"The meters drilled were above the norm and we were well within and even under budget lets say..."

★★★★★ North America

"We had a good wear on the crown, the meters achieved are also worth commenting on being consistently all right around the 300'm. We're happy and the reaming shells are also performing well.

★★★★★ Australia

"The succesful trial results of the bit prove this bit to be a serious alternative to our current bit of choice at our mine".
